

Protect Your Investment
Trust the Best... Trust Bendix.

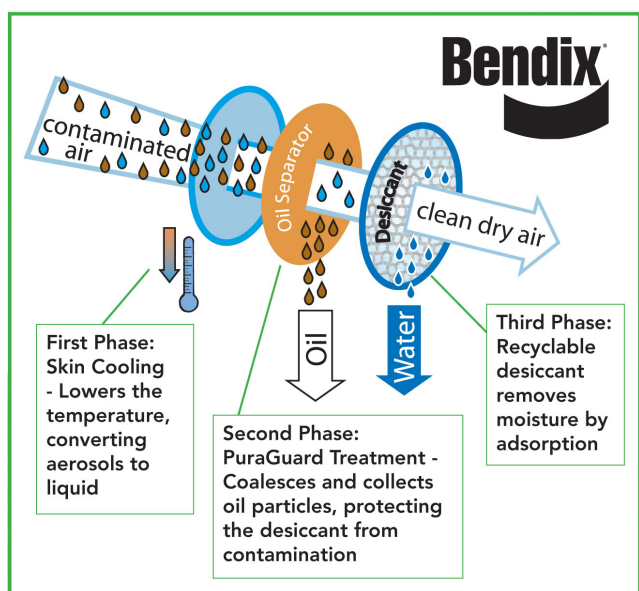

Introducing the next generation of air dryer cartridges: **Bendix® Puraguard® oil coalescing cartridges**

- EPA regulations in 2007 and 2010 dramatically reduced the allowable diesel engine emissions. In response, technologies like Advance Gas Recirculation (EGR), Selective Catalytic Reduction (SCR) and Diesel Particulate Filter (DPF) were introduced to meet these regulations.
- PuraGuard® oil coalescing technology from Bendix is critical in protecting your investment by preserving the newly developed vehicle systems found on your vehicles.
- Examples: The DEF injector valve on the EPA 10 emission systems and the air operated control valves found on auto-shift transmissions are extremely sensitive to oil contamination.

Features and Benefits

When air contaminated with oil is sent into these systems, you risk shortening its life and the possibility of significant spending for repairs.

- The oil coalescing filter is placed before the desiccant, ensuring the removal of oil and oil aerosols.
- This placement is critical because oil fouls the desiccant and diminishes its ability to remove moisture.

System Saver 1200 Plus Air Dryer

AD9™ Style Retrofit

- Purge volume is internal to the air dryer, no need for external purge tanks, and does not use system air for regeneration
- Integral governor simplifies plumbing, reduces overall installed cost, has improved functionality and faster response timing
