Dramatically Improve Performance Over Standard Landing Gear Crank Handles

\$18.69

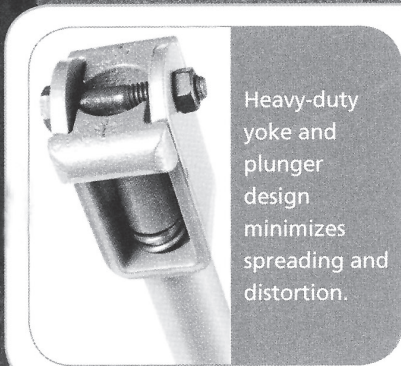

SPEED CRANK™

From SAF-HOLLAND

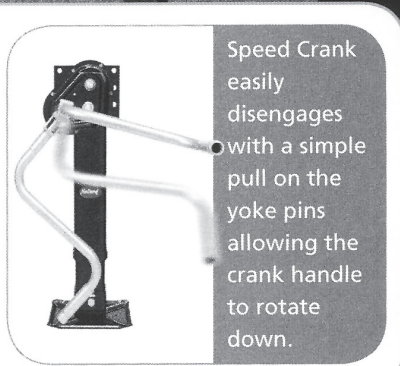

No more struggling with the problems of conventional cranks that come off the input shaft when shifting gears or cranking the landing gear.

- Automatic locking device engages by lifting the crank into position
- Will not slip off the input shaft when cranking or pulling out to shift gears
- The user friendly design can be heard clicking into the engaged position letting the user know it is ready to crank
- Metal rotating grip handle
- Standard powder coat finish

Heavy-duty yoke and plunger design minimizes spreading and distortion.

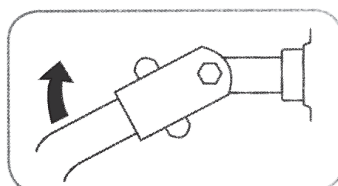

Speed Crank easily disengages with a simple pull on the yoke pins allowing the crank handle to rotate down.

SPEED CRANK™ Operation Instructions

To engage Speed Crank, lift handle until it automatically locks to input shaft.

To release Speed Crank, pull lock pins towards you and move down.

To stow Speed Crank, swing crank handle to the down position.
